

IMPORTANT INFORMATION: FIRMAGON® (degarelix acetate) upcoming name/PIP code change

Dear Healthcare Professional,

Following our previous communication, we would like to confirm that Ferring Pharmaceuticals has removed the brand name FIRMAGON® (degarelix acetate) from our 120 mg and 80mg powder and solvent for solution for injections. The product will be sold under its new and generic name, Degarelix Ferring, from July 2025.

We want to assure you that this change will not impact the quality or efficacy of our degarelix acetate products. There will be no alterations to the marketing authorisation holder, manufacturer or package size, and any modifications to the packages' look and feel are minimal as you can see below.

The launch of both Degarelix Ferring formulations is accompanied by a further 10% price reduction- also see below.

Product names	Pack Image	PIP code	NHS List Price	Date
Previous: FIRMAGON® 120mg powder and solvent for solution for injections.		114-7644	£176.12	End: June 2025
New: Degarelix Ferring 120mg powder and solvent for solution for injection.		128-4082	£157.90	Start: July 2025
Previous: FIRMAGON® 80mg powder and solvent for solution for injection.		114-7636	£89.01	End: June 2025
New: Degarelix Ferring 80mg powder and solvent for solution for injection.		128-4082	£79.90	Start: July 2025

We kindly request that once the new product becomes available, you promptly place an order for the **Degarelix Ferring** products using the new PIP Codes provided on page 1. This will ensure that there are no delays or issues in dispensing this product to your patients.

If you require any further information or assistance with updating your system, please do not hesitate to contact us.

Thank you for your understanding and attention to this matter. Sincerely,

Mel Foster-Hawes
General Manager Ferring UK Ireland
